PLEASE read this instruction manual and the safety instruction before operating the product.
When using electrical appliances basic safety precautions should always be followed including following:

**Read all instructions carefully.**

- In case of emergency immediately remove plug from power outlet.
- Do not touch hot surfaces. Use levers or knobs.
- To protect against fire electric shock and personal injury, do not immerse cord, plug or appliance in water or other liquid. Never clean the appliance or the power cord if those are humid. Avoid touching the machine with wet hands.
- Keep the power cord out of the reach of children.
- Close supervision is required when any appliance is used by or near children.
- Unplug appliance from outlet if leaving for an extended period of time (vacation, etc)
- Allow to cool before adding or removing parts, and before cleaning the appliance.
- Please turn the power off if you want to add the water when the machine switches on or the machine is working.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunction, or has been damaged in any manner. Return appliance to the authorized distributor, and they will repair by professional staff.
- Please do not dismantle the machine or do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.
- The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock or personal injury.
- Always attach plug to appliance first, then plug cord into wall outlet. To disconnect turn off appliance, then remove plug from wall outlet.
- Do not use appliance for other than intended purposes.
- Do not put fingers inside capsule housing due to sharp edges.
POWERM CORD INSTRUCTIONS
REGARDING THE POWER CORD:

► A short power cord is provided to reduce risks that may result from longer and tangled cords.
► If the plug of the machine does not fit into the socket, so please let qualified person to replace it or return to the authorized distributor to replace it. The use of adaptors, multiple outlet or extension cords is not advised.
► If they have to be used it is necessary to use simple or multiple adaptors and extension cord is used 1) the marked electrical rating of simple or multiple adaptors or extension cord should be at least as great as the electrical rating of the appliance. 2) The longer cord should be arranged so that is will not drape over the counter to or table top where it can be pulled on by children or tripped over. 3) Please go to the local electrical stores to buy the extension cords, and do not use supersession extension cords.

CAUTION

Household use only. Do not use outdoors. To reduce the risk of fire or electric shock, any servicing other than cleaning and user maintenance should be performed by an authorized service representative by authorized distributors.
UNDER NO CIRCUMSTANCES SHOULD YOU OPEN THE MACHINE YOURSELF
► Check voltage to be sure that the voltage indicated on the name of plate corresponds with your voltage.
► Never use warm or hot water to fill the water container. Use cold water only!
► Keep your hands and the cord away from hot parts of the appliance during operation.
► Do not touch or use the equipment with wet or damp hands or in bare feet.
► Do not allow the appliance be used by children or unskilled persons with out supervisor.
SAFETY INSTRUCTIONS

Read this instruction carefully before using your machine.

► Do not plug the machine into anything other than a grounded electrical socket. Verify that the voltage indicated on the technical specifications on the unit corresponds to your electrical installation. The use of incorrect connection voids warranty.
► Unpacking and Placement: 1). Remove the machine from its packaging and check that all the parts are there and not broken. 2). Please put the machine on a flat surface and strong enough to bear its weight. 3). Do not install or use the machine near curtains or other flammable material and do not place anything on top of it during use. 4). Do not place the machine on top of, or close to, additional oven or other equipment that generates heat (for instance, radiators etc). 5). Make sure there is enough space around the machine for proper ventilation.
► Do not use the machine without the drip tray and grid in place.
► Do not lift the closing lever while the machine is functioning since coffee is extracted under high pressure.
► Avoid touching the electrical cord as well as any other part which may become hot during the use of the machine.

Fig.1
2. First Use or after a longer period of non use

- FILL WATER TANK (Fig3-I)
- PLUG INTO MAINS + SWITCH ON (Fig-L)
- PLACE A CONTAINER UNDER THE COFFEE OUTLET
  SOFT CAPSULE
  1. Do not put the capsule into the machine for the first time to use
  2. Power on the machine. Press the coffee button when the indicators are stop blinking.
  3. The hot water will comes out from coffee outlet.
  4. Do the same process as the above steps for 3-4times.
  HARD CAPSULE
  1. Put the capsule into the machine
  2. Following the step for making the coffee.
  3. Do the first capsule to use 3-4times.

- After doing the first time process, then you can start to making the coffee, see the following steps.
3. Making coffee

I. Please see the pictures are below: Two coffee button indicators are blinking, that is means the machine is heating up. It is ready to make the coffee when the indicators are stop blinking.

II. Raising the lever (Fig 4-A), place a capsule (Fig 4-M) into the capsule enter (Fig 4-B), and then close the lever (Fig 5).

III. Place a cup (Fig 4-M) on the drip grid, and press the switch on the ON/OFF button. (See Fig 5).

IV. Then press the small cup or big cup, start dispensing from coffee outlet. It will stop automatically when the coffee finishes making, and the capsule will drop automatically to the capsule container. (Fig 6-E)
4. Water adjustment for coffee machine

a) Power off the coffee machine
b) Press the coffee button 2-3 seconds (do not leave hand on the coffee button) and power on the coffee machine. You will see the coffee indicator light is blinking slowly, then you press the small cup or big cup coffee button. You can adjust the volume that you want.
c) Then you power off the coffee machine. The coffee machine has memory function. The same volume that you adjusted when you start to press the coffee button again.
d) If you want to adjust the volume again, you need to follow the above process.

5. Clean When necessary

Before doing any cleaning, ALWAYS disconnect the plug from the power socket.

- Capsule container only can contain 10 capsules, must to clean the capsule container very often. We suggest that to clean the capsule container after you make coffee for 5-6cups.
- **NO ABRASIVE, NO SOLVENT CONTAINER, NO DISHWASHER**
- Remember only can wash the capsule container, the other parts that only can use damp cloth to clean the machine
- **ALWAYS** leave plug from socket before you use damp cloth to clean the machine.
- Please see 2 when you not use the machine for long time.
6. Descaling

- Descale the machine periodically.

The frequency of this operation depends on the hardness of the water used.

- Pour a measure of descaling liquid into tank (Fig 1-1)-follow the above instruction.

Only use descaling liquid for espresso coffee machine

- Make sure there is no capsule in the capsule enters (Fig1-B), and then close the lever, to start to the machine.
- Dispense hot water 3-4 times by pressing coffee button.
